### WEEK 1 — PROPORTIONAL DRAWING

Addresses the foundations of manipulating charcoal to render high quality drawings. The fundamentals of abstract thinking and the building of professional level quality controls are instilled during this week.

### WEEK 2 — OIL PAINTING FOUNDATIONS

Fundamentals of oil painting begin with learning to control the palette to make 'light' the subject of the finished works. Students have an opportunity to investigate the inner workings of producing fully realized paintings from still-life.

### WEEK 3 — LIVE PORTRAIT PAINTING IN OIL

Addresses structure for form and color theory for realistic flesh tones while working with live models. Students will learn how to break down the form into simple shapes to capture a likeness of the subject.

### WEEK 4 — PROFESSIONAL OIL TECHNIQUES

Students will apply all of their newly developed skills to a single highly polished self portrait. This last week will address the techniques employed by top-tier professional artists to create painting in oil. These self portraits are the beginnings in crafting professional level artwork.

**This course is meant for Foundational training,  
no prior experience is necessary to enroll.**
